Introduction

Deployment Release	
Number	760534
Title	MLink
Product Version	2.17.9628
Subversion Revision	5508
Archive Filename	Microsoft MSI

1.1 Overview

- Update MLink to send user-agent when logging in via Insight (Auth API user changes)
- On sending M680/M720 config to device, do not try and send RAT if modem model is 0
- Added option to output the comms debug to a file using the app.config setting
- Changed the get config folder to revert to users MyDocuments has a fall back.
- Insight M680 to V3 changes required a change to the way M680/M720 devices are obtained. Now uses the same end point used for getting Connex devices.
- Fixes issue with configuring M680/M720 switch IO when connected to a device. It worked fine when offline and a configuration was then uploaded to a counter.
- Added missing 'Description' button to 'Config Survey General'
- LPMAXFREQ and LPMINFREQ for Connex are now only available up to and including version 1.22.1
- Fix to OSP/OSP+ output text not saving correctly

1.2 Identification

Software number and version can be found on the MLink home page under 'Help / About'.

2 Deployment

2.1 Target Systems

- Windows 11

2.2 Pre-requisites
